# eLearning Module

Katherine Kim

Objective

- Create a required instructional design module to support eLearning content

An introduction course that highlights the product benefits, work flow, and key features.

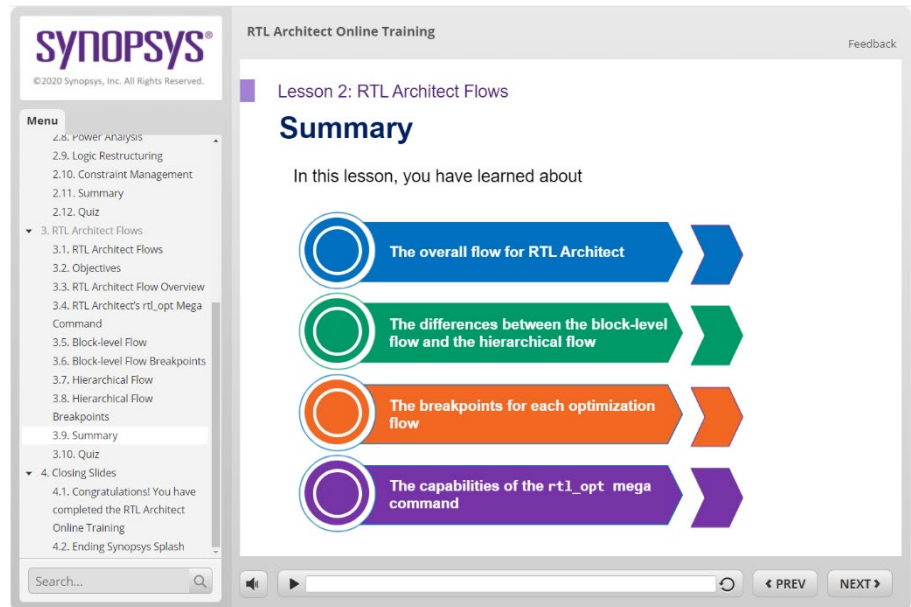

Figures, short bullet points, and audio scripts are all incorporated to produce an effective learning module.

My role

- Compiled relevant information
- Wrote slide text and audio script
- Created comprehensive quizzes
- Developed story board

Outcome
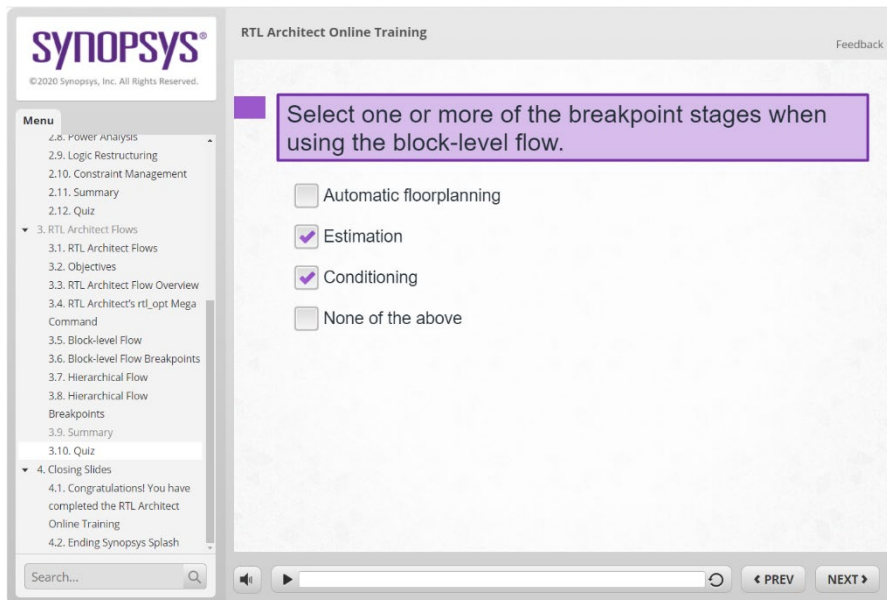

- Introduce RTL designers to a new product
- Promote the product's functionality and features

After every section, there is a summary that lists all the key topics of that section.

What I learned

- Practiced writing techniques: visual text versus audio text
- Developed instructional design skills
- Learned new storyboard software program (Articulate Storyline 360)

A quiz at the end of each section guarantees users comprehend the topics covered in the section.
