# eLearning Module

Katherine Kim

Objective

- Create a required instructional design module to support specific product eLearning content

An introduction course that highlights the product benefits, workflow, and key features.

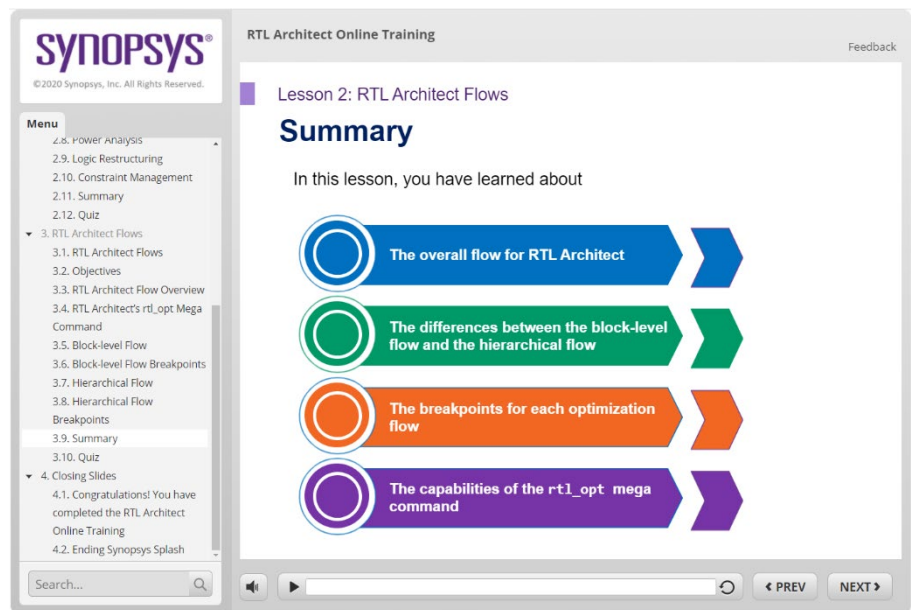

My role

- Compiled relevant information
- Wrote slide text and audio script
- Created comprehensive quizzes
- Developed storyboard outline

Figures, short bullet points, and audio scripts are all incorporated to produce an effective learning module.

Outcome

- Introduce RTL designers to a new product
- Promote the product's functionality and features

After every section, there is a summary that lists all the key topics of that section.

What I learned

- Practiced writing techniques: visual text versus audio text
- Learned new software program (Articulate Storyline 360)

A quiz at the end of each section guarantees users comprehend the topics covered in the section.

DIGITAL IMPLEMENTATION
FY21'Q1 Certificate of Appreciation

SYNOPSYS®
Silicon to Software™

Is hereby granted to:

Kat Kim

For successfully completing the Instructional Design program launched by DG TechPubs in July'2020 and delivering RTL Architect Online Training eLearning module
